NECO DC Group Controller

FEATURES

- Simultaneously operates up to 20 motors
- *Only* compatible with NECO DC Tubular Motors
- Suitable for all commercial and retail sites/ premises

DESCRIPTION

The NECO DC Group Controller can be connected to the NECO fire curtain system.

Fire Curtain Systems +6 meters wide

The group controller can operate multiple rollers connected to one fire curtain system once the fire alarm is activated.

Multiple Fire Curtains

Where multiple fire curtains are fitted across a site, the group control panel operates them at the same time.

Fire Alarm

If only one fire alarm connection is available, all the fire curtains can be connected through the group control panel.
